

Future of Work - Complete Lesson

C1 · Ages 16-18 · 75 min · Speaking · + Writing

Overview

Learning objective: Present an evidence-linked proposal for adapting to workplace change, with prioritized skills, a resource trade-off and a measurable review plan.

Main skill: Speaking

Secondary skill: Writing

Duration: 75 minutes

Class size: 20 students

Group work: Groups of 2

Success criteria

- State a clear response that meets the task.
- Use specific details from the supplied material.
- Respond to another view and recognize an appropriate limitation.

Materials needed

-
- Student worksheets A and B with reading and listening questions; teacher answer keys.
 - Supplied case and situation cards; paper and pens.
 - Projector / screen. Included recording and student slides.

Teacher preparation

- Read the two scripts and check the teacher keys before teaching.
- Print one selected worksheet version per learner; keep teacher copies separate.
- Prepare the supplied role cards. No outside article or paid material is needed.
- Present the studio as a fictional scenario, not a forecast about any real job market. Students may use imagined career interests.

Key language

-
- employment
 - automation
 - adaptability
 - qualification

- workforce
- The evidence supports ____, but does not establish ____ .
- We prioritize ____ over ____ because the immediate constraint is ____ .
- We would revise this proposal if ____ .

Lesson plan - 75 minutes

6 min - Connect and set the goal

Teacher: Invite an initial view on the case, then state the objective and distinguish the fictional scenario from factual research.

Students: State an initial view and one question you want the case to answer.

Materials: Opening slide or printed opening card

Purpose: Activate prior knowledge without testing unfamiliar language.

10 min - Teach the five key words

Teacher: Model the five terms using their definitions and examples. Ask learners to explain a distinction in their own words.

Students: Complete Section A and compare meanings with a partner.

Materials: Vocabulary cards; worksheet Section A

Purpose: Writing supports the main speaking task.

12 min - Read for meaning

Teacher: Give a first reading for the main situation, followed by the four evidence questions. Clarify only vocabulary essential to meaning.

Students: Read the passage, answer the questions and locate the supporting words.

Materials: Reading passage and four questions, supplied in the worksheet

Purpose: Establish a shared context and check literal understanding before interpretation.

10 min - Listen for a change or decision

Teacher: Play the included recording twice: once for the main situation, then again after learners read the three questions. Use the teacher transcript to resolve disputed evidence.

Students: Identify the main situation, then answer the three detail questions and compare evidence.

Materials: Supplied listening script and questions

Purpose: Practice listening with information that differs from the reading.

13 min - Guided language practice

Teacher: Use Version A Sections B and C. Model one response, then let pairs work. Keep Version B for a later lesson, reassessment or fast finishers. For children, Sections D and E are optional additional practice.

Students: Apply the sentence frames, then respond to the five application prompts.

Materials: Worksheet A; sentence frames; optional worksheet B

Purpose: Move from recognition to usable language.

20 min - Pitch a six-week training pilot

Teacher: Arrange groups of 2. Read the supplied role or situation cards and assign roles. Require a choice, supporting reasons and a response to another view. Monitor using the assessment criteria.

Students: Complete the group task, present your decision and respond to one question.

Materials: All situation cards appear under Activities and on the student slides

Purpose: Demonstrate the objective through a purposeful exchange.

4 min - Exit check and next step

Teacher: Use the three exit prompts. Record which part of the objective needs another model. Explain the short homework; use the separate assessment later if needed.

Students: Give an independent response and identify one point to improve.

Materials: Exit ticket and homework instructions

Purpose: Check individual progress after supported group work.

Classroom activity - Pitch a six-week training pilot

Objective: Present an evidence-linked proposal for adapting to workplace change, with prioritized skills, a resource trade-off and a measurable review plan.

Time: 20 minutes

Grouping: Groups of 2

Materials: Studio constraint: Twelve employees; two paid training afternoons; a six-week pilot.

Deliverable: A one-page proposal with two skills, a schedule, an assessment and a review rule.

Review panel: Question one assumption, one resource trade-off and the difference between task speed and overall service quality.

Teacher instructions

- Use the exact situation cards below; no additional resource is needed.
- Form groups of 2 and model one short response.
- Allow 15 minutes for preparation and practice; use the remaining time for responses and feedback.

- Score each criterion 0-2: a clear conditional position; accurate evidence; a meaningful counterargument; a feasible recommendation. 6/8 indicates the task is substantially met. These are task rubrics, not formal CEFR certification.

Student instructions

- Studio constraint: Twelve employees; two paid training afternoons; a six-week pilot.
- Deliverable: A one-page proposal with two skills, a schedule, an assessment and a review rule.
- Review panel: Question one assumption, one resource trade-off and the difference between task speed and overall service quality.

Example: We propose operation training followed by critical review. Employees will demonstrate checking on realistic notes. We will compare total processing time and confirmed errors after six weeks, and postpone expansion if reliability deteriorates.

Variation: Exchange recommendations with another group and write one constructive challenge.

Homework

Continue the learning

Use the lesson materials. No additional purchase or research is required.

- Write a 250-300-word proposal using the group's pilot plan.
- Include a limitation, a cost in staff time, and a clear review rule.

Estimated time: 20 minutes

Exit ticket - 4 min

-
- Prioritize two training skills and explain the choice.
 - Include a worker participation safeguard.
 - Name one point you would improve in your response.

Success looks like: Score each criterion 0-2: a clear conditional position; accurate evidence; a meaningful counterargument; a feasible recommendation. 6/8 indicates the task is substantially met. These are task rubrics, not formal CEFR certification.

Teacher notes

-
- Score each criterion 0-2: a clear conditional position; accurate evidence; a meaningful counterargument; a feasible recommendation. 6/8 indicates the task is substantially met. These are task rubrics, not formal CEFR certification.
 - Reading and listening tell different stories. Keep their keys separate.
 - Student slides include tasks and language models. Facilitation notes and transcript answers belong in the separate teacher documents.

Student worksheet - Version A

Name: _____ Class: _____ Date: _____

Complete the sections your teacher assigns. Use the reading and the supplied case details. Version B is an alternative for later practice.

Section A - Meet the key words

Match each definition to a word from the bank.

Word bank

employment | automation | adaptability | qualification | workforce

1. Paid work or the condition of having a job.

2. Using a system to carry out tasks with less direct human action.

3. The ability to respond effectively to changed conditions.

4. A recognized achievement or evidence of competence.

5. The people who work in an organization or economy.

Reading - A Training Plan for Northbridge

Read the passage and answer the questions.

Northbridge is a fictional design studio with twelve employees. Its managers are considering a system that drafts routine project summaries from approved notes. Currently, staff spend part of each week producing these summaries and checking them with clients. The proposed system may reduce drafting time, but nobody has yet tested how accurately it handles ambiguous notes or unusual requests. The case does not assume that an entire occupation will disappear.

A pilot team proposes a six-week trial. Staff would compare draft summaries with the original notes, record errors and seek client confirmation before anything is finalized. The trial would therefore change the distribution of tasks: less initial drafting might be balanced by more verification, exception handling and communication. Whether the overall workload falls remains an open question.

The studio has only two paid training afternoons available during the pilot. One proposal uses both afternoons to teach system operation. A second divides the time between operation and critical review, including how to identify an unsupported conclusion and explain an uncertainty to a client. The second proposal covers fewer features but may address a wider range of risks.

An employee representative adds that learning outside paid hours would affect workers unequally. Some have caring responsibilities or other commitments. She argues that adaptability should be supported by organizational time and clear procedures, rather than treated solely as an individual personality trait. Managers agree that a certificate alone would not prove competence; employees should demonstrate the skills on realistic examples.

At the end of six weeks, the team plans to review accuracy, total time spent, client corrections and staff feedback. A faster first draft would not count as success if verification or rework increased substantially. The decision to expand the system will depend on the whole process, not on an impressive demonstration.

1. What has not yet been tested?

2. Why might less drafting not reduce total workload?

3. What is the training constraint?

4. Why is a certificate insufficient in this case?

Section B - Language in use

Respond using language that fits the situation.

1. Correct the overclaim: Automated summaries will eliminate design jobs.

2. Distinguish a qualification from demonstrated competence.

3. Name a task likely to remain important in the proposed pilot.

4. Write a measurable question about total workload.

5. Explain one equity concern about unpaid training.

Section C - Apply and explain

Give a reason, an example or a case detail when the prompt asks for one.

1. Prioritize two training skills and explain the choice.

2. Allocate the two paid afternoons.

3. Choose two process measures.

4. Include a worker participation safeguard.

5. Present a conditional recommendation.

Listening - The Employee Representative's Proposal

Listen for meaning, then answer the questions.

1. How would the two afternoons be used?

- a) Operation, then checking realistic examples
- b) Two afternoons of advanced features
- c) Only certificate preparation

2. What trade-off does the proposal acknowledge?

- a) Some advanced features are postponed
- b) All clients leave
- c) Staff stop learning

3. What should trigger revision?

- a) Errors take longer to resolve despite faster drafting
- b) Everyone attends training
- c) Staff ask useful questions

Student worksheet - Version B

Name: _____ Class: _____ Date: _____

Complete the sections your teacher assigns. Use the reading and the supplied case details. Version B is an alternative for later practice.

Section A - Use the key words

Write a sentence that shows each word's meaning.

Word bank

employment | automation | adaptability | qualification | workforce

1. Use "employment" in a sentence about this lesson.

2. Use "automation" in a sentence about this lesson.

3. Use "adaptability" in a sentence about this lesson.

4. Use "qualification" in a sentence about this lesson.

5. Use "workforce" in a sentence about this lesson.

Reading - A Training Plan for Northbridge

Read the passage and answer the questions.

Northbridge is a fictional design studio with twelve employees. Its managers are considering a system that drafts routine project summaries from approved notes. Currently, staff spend part of each week producing these summaries and checking them with clients. The proposed system may reduce drafting time, but nobody has yet tested how accurately it handles ambiguous notes or unusual requests. The case does not assume that an entire occupation will disappear.

A pilot team proposes a six-week trial. Staff would compare draft summaries with the original notes, record errors and seek client confirmation before anything is finalized. The trial would therefore change the distribution of tasks: less initial drafting might be balanced by more verification, exception handling and communication. Whether the overall workload falls remains an open question.

The studio has only two paid training afternoons available during the pilot. One proposal uses both afternoons to teach system operation. A second divides the time between operation and critical review, including how to identify an unsupported conclusion and explain an uncertainty to a client. The second proposal covers fewer features but may address a wider range of risks.

An employee representative adds that learning outside paid hours would affect workers unequally. Some have caring responsibilities or other commitments. She argues that adaptability should be supported by organizational time and clear procedures, rather than treated solely as an individual personality trait. Managers agree that a certificate alone would not prove competence; employees should demonstrate the skills on realistic examples.

At the end of six weeks, the team plans to review accuracy, total time spent, client corrections and staff feedback. A faster first draft would not count as success if verification or rework increased substantially. The decision to expand the system will depend on the whole process, not on an impressive demonstration.

1. What has not yet been tested?

2. Why might less drafting not reduce total workload?

3. What is the training constraint?

4. Why is a certificate insufficient in this case?

Section B - Language in use

Respond using language that fits the situation.

1. Qualify: Fast output means successful automation.

2. Turn adaptability into a specific observable skill.

3. Name a trade-off in the two-afternoon plan.

4. Specify an assessment beyond attendance.

5. Write a condition for delaying expansion.

Section C - Apply and explain

Give a reason, an example or a case detail when the prompt asks for one.

1. Design one realistic competence check.

2. Explain why a job is more than one task.

3. Identify one uncertainty the pilot can address.

4. Identify one claim this small pilot cannot establish.

5. Defend a revision rule in a one-minute pitch.

Listening - The Employee Representative's Proposal

Listen for meaning, then answer the questions.

1. How would the two afternoons be used?

- a) Operation, then checking realistic examples
- b) Two afternoons of advanced features
- c) Only certificate preparation

2. What trade-off does the proposal acknowledge?

- a) Some advanced features are postponed
- b) All clients leave
- c) Staff stop learning

3. What should trigger revision?

- a) Errors take longer to resolve despite faster drafting
- b) Everyone attends training
- c) Staff ask useful questions

Teacher answer key

How to run the worksheet

Present an evidence-linked proposal for adapting to workplace change, with prioritized skills, a resource trade-off and a measurable review plan.

Score each criterion 0-2: a clear conditional position; accurate evidence; a meaningful counterargument; a feasible recommendation. 6/8 indicates the task is substantially met. These are task rubrics, not formal CEFR certification.

Group work guidance

Groups of 2; give everyone a speaking or checking role and rotate. Use Version B as alternate practice, not as a second full worksheet in the same session.

Answers - Version A

Section A - Meet the key words

1. Paid work or the condition of having a job. -> employment
2. Using a system to carry out tasks with less direct human action. -> automation
3. The ability to respond effectively to changed conditions. -> adaptability
4. A recognized achievement or evidence of competence. -> qualification
5. The people who work in an organization or economy. -> workforce

Teaching point: Check meaning before form.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Reading - A Training Plan for Northbridge

1. What has not yet been tested? -> Accuracy with ambiguous notes and unusual requests.
2. Why might less drafting not reduce total workload? -> Verification and other tasks may increase.
3. What is the training constraint? -> Two paid afternoons.
4. Why is a certificate insufficient in this case? -> Competence should be demonstrated on realistic examples.

Teaching point: Use the passage, not outside knowledge.

Model answers: 1. Evidence: nobody has yet tested how accurately it handles ambiguous notes or unusual requests | 2. Evidence: less initial drafting might be balanced by more verification, exception handling and

communication | 3. Evidence: The studio has only two paid training afternoons available during the pilot. |

4. Evidence: employees should demonstrate the skills on realistic examples

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Section B - Language in use

1. Correct the overclaim: Automated summaries will eliminate design jobs. -> The pilot concerns summary drafting; the case does not establish job elimination.

2. Distinguish a qualification from demonstrated competence. -> A qualification records an achievement; competence requires evidence of effective performance.

3. Name a task likely to remain important in the proposed pilot. -> Checking a draft against source notes or clarifying uncertainty with a client.

4. Write a measurable question about total workload. -> How does total drafting, checking and correction time compare with the previous process?

5. Explain one equity concern about unpaid training. -> Employees with caring responsibilities may have less time to participate.

Teaching point: Speaking practice with writing support.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Section C - Apply and explain

1. Prioritize two training skills and explain the choice. -> Basic operation and critical review address immediate use and reliability risks.

2. Allocate the two paid afternoons. -> One operation workshop and one applied review workshop, with clear tasks.

3. Choose two process measures. -> Total completion time and confirmed error rate; define how each is recorded.

4. Include a worker participation safeguard. -> Collect confidential feedback during paid time and allow staff to flag unreliable output.

5. Present a conditional recommendation. -> Proceed with a limited pilot, subject to accuracy, workload and participation checks.

Teaching point: Speaking practice with writing support.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Listening - The Employee Representative's Proposal

1. How would the two afternoons be used? -> Operation, then checking realistic examples
2. What trade-off does the proposal acknowledge? -> Some advanced features are postponed
3. What should trigger revision? -> Errors take longer to resolve despite faster drafting

Teaching point: Read or listen twice. Answers refer only to this script.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Teacher transcript:

Before we decide which training to buy, I want us to separate two questions. The first is whether staff can operate the new system. The second is whether they can judge its output responsibly. Being able to produce a fluent draft does not establish that the draft is accurate.

I propose using our first training afternoon for basic operation and our second for checking realistic examples. In the review session, people would compare a summary with its source notes, identify unsupported claims and explain unresolved questions to a client. That approach leaves some advanced features for later, which is a real trade-off.

I also want the studio to protect learning time. If employees have to practice after work, those with caring responsibilities may have fewer opportunities. Adaptability should be supported through the way work is organized, not just demanded in a job description.

After six weeks, we should review the time spent on the entire process, including corrections. We should also ask whether employees feel able to challenge an unreliable result. If drafting becomes faster but errors take longer to resolve, we should revise the plan. The goal is a more reliable service and a workforce that can exercise informed judgment, rather than a certificate that everyone receives for attending.

Read the questions aloud for young learners. Replay or reread in short sections if needed.

Answers - Version B

Section A - Use the key words

1. Use "employment" in a sentence about this lesson. -> Employment involves more than completing isolated tasks.
2. Use "automation" in a sentence about this lesson. -> Automation can change part of a role.
3. Use "adaptability" in a sentence about this lesson. -> Adaptability includes revising an unsuccessful approach.

4. Use "qualification" in a sentence about this lesson. -> A qualification should demonstrate relevant learning.

5. Use "workforce" in a sentence about this lesson. -> The workforce needs time to learn new processes.

Teaching point: Check meaning before form.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Reading - A Training Plan for Northbridge

1. What has not yet been tested? -> Accuracy with ambiguous notes and unusual requests.

2. Why might less drafting not reduce total workload? -> Verification and other tasks may increase.

3. What is the training constraint? -> Two paid afternoons.

4. Why is a certificate insufficient in this case? -> Competence should be demonstrated on realistic examples.

Teaching point: Use the passage, not outside knowledge.

Model answers: 1. Evidence: nobody has yet tested how accurately it handles ambiguous notes or unusual requests | 2. Evidence: less initial drafting might be balanced by more verification, exception handling and communication | 3. Evidence: The studio has only two paid training afternoons available during the pilot. | 4. Evidence: employees should demonstrate the skills on realistic examples

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Section B - Language in use

1. Qualify: Fast output means successful automation. -> Fast output is useful only if accuracy and downstream work remain acceptable.

2. Turn adaptability into a specific observable skill. -> Revise a checking procedure after identifying a recurring error.

3. Name a trade-off in the two-afternoon plan. -> Time spent on critical review reduces time for advanced system features.

4. Specify an assessment beyond attendance. -> Compare a draft with notes and explain two unsupported claims correctly.

5. Write a condition for delaying expansion. -> Delay expansion if total correction time rises or serious errors persist.

Teaching point: Speaking practice with writing support.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Section C - Apply and explain

1. Design one realistic competence check. -> Provide source notes and a flawed summary; assess detection, correction and explanation.
2. Explain why a job is more than one task. -> The role also includes judgment, communication and handling unusual cases.
3. Identify one uncertainty the pilot can address. -> Whether the system handles ambiguous notes accurately.
4. Identify one claim this small pilot cannot establish. -> A general prediction about employment across the whole economy.
5. Defend a revision rule in a one-minute pitch. -> State a threshold or review criterion, explain its purpose and avoid claiming unsupported forecasts.

Teaching point: Speaking practice with writing support.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Answers are in item order. Model responses are examples, not the only acceptable wording.

Listening - The Employee Representative's Proposal

1. How would the two afternoons be used? -> Operation, then checking realistic examples
2. What trade-off does the proposal acknowledge? -> Some advanced features are postponed
3. What should trigger revision? -> Errors take longer to resolve despite faster drafting

Teaching point: Read or listen twice. Answers refer only to this script.

Common errors: Answering a different question or giving a claim without the requested detail.

Corrections: Return to the exact prompt. Accept accurate equivalent wording for open responses.

Notes: Teacher transcript:

Before we decide which training to buy, I want us to separate two questions. The first is whether staff can operate the new system. The second is whether they can judge its output responsibly. Being able to produce a fluent draft does not establish that the draft is accurate.

I propose using our first training afternoon for basic operation and our second for checking realistic examples. In the review session, people would compare a summary with its source notes, identify unsupported claims and explain unresolved questions to a client. That approach leaves some advanced features for later, which is a real trade-off.

I also want the studio to protect learning time. If employees have to practice after work, those with caring responsibilities may have fewer opportunities. Adaptability should be supported through the way work is organized, not just demanded in a job description.

After six weeks, we should review the time spent on the entire process, including corrections. We should also ask whether employees feel able to challenge an unreliable result. If drafting becomes faster but errors take longer to resolve, we should revise the plan. The goal is a more reliable service and a workforce that can exercise informed judgment, rather than a certificate that everyone receives for attending.

Read the questions aloud for young learners. Replay or reread in short sections if needed.

Assessment answers

1. Prioritize two training skills and explain the choice.

Answer: Basic operation and critical review address immediate use and reliability risks.

2. Allocate the two paid afternoons.

Answer: One operation workshop and one applied review workshop, with clear tasks.

3. Choose two process measures.

Answer: Total completion time and confirmed error rate; define how each is recorded.

4. Include a worker participation safeguard.

Answer: Collect confidential feedback during paid time and allow staff to flag unreliable output.

5. Present a conditional recommendation.

Answer: Proceed with a limited pilot, subject to accuracy, workload and participation checks.

Assessment guidance

Score each criterion 0-2: a clear conditional position; accurate evidence; a meaningful counterargument; a feasible recommendation. 6/8 indicates the task is substantially met. These are task rubrics, not formal CEFR certification.

Support

Reduce the number of ideas to compare while keeping the same reasoning goal.

Sentence frames

- The evidence supports ____, but does not establish ____ .
- We prioritize ____ over ____ because the immediate constraint is ____ .
- We would revise this proposal if ____ .

Word bank

- employment
- automation
- adaptability
- qualification
- workforce

Worked examples

- We propose operation training followed by critical review. Employees will demonstrate checking on realistic notes. We will compare total processing time and confirmed errors after six weeks, and postpone expansion if reliability deteriorates.

Smaller steps

- State the situation in one sentence.
- Select one relevant detail.
- Use a frame to explain the response.
- Add a limitation or another view.

Guided practice

- Correct the overclaim: Automated summaries will eliminate design jobs. Model: The pilot concerns summary drafting; the case does not establish job elimination.
- Prioritize two training skills and explain the choice. Model: Basic operation and critical review address immediate use and reliability risks.

Challenge

Extend the same objective with less scaffolding and more independent explanation.

- Redesign the proposal if only one training afternoon is approved.
- Explain what evidence would justify reversing your recommendation.
- Which assumption does your response depend on?
- What evidence or constraint would change your choice?

Pacing: the package includes more practice than one class needs.

Teach the selected Version A tasks and keep Version B, extension work and the independent assessment for follow-up.

Sensitive or misleading assumptions.

Present the studio as a fictional scenario, not a forecast about any real job market. Students may use imagined career interests.

Presentation - teaching notes

Teacher copy. Keep this guide separate from the student PowerPoint. Slide numbers below refer to the numbered lesson slides; an exported slide may continue over several pages.

1. Future of Work

Separate tasks from jobs, question assumptions, and defend a realistic training proposal.

Task: What do you already know about this topic?

Teacher note: Allow thinking time, then invite a response. Accept equivalent language that meets the objective.

Purpose: Build toward the stated learning objective.

2. Today's goal

Present an evidence-linked proposal for adapting to workplace change, with prioritized skills, a resource trade-off and a measurable review plan.

Task: Explain the goal in your own words.

Teacher note: Allow thinking time, then invite a response. Accept equivalent language that meets the objective.

Purpose: Build toward the stated learning objective.

3. Look and discuss

Which tasks need human judgment?

Propose training that would help this team use new tools.

Teacher note: Use this picture during the opening discussion. Accept different accurate responses. This is an illustrative scene, not evidence about real people or a substitute for the reading passage.

Purpose: Build toward the stated learning objective.

Visual guidance: Adults review computer work against printed notes in a design studio, while a mentor helps a colleague.

4. employment

employment: Paid work or the condition of having a job.

Employment involves more than completing isolated tasks.

Task: Use the word in a new example.

Teacher note: Model "employment" with the supplied example. Check that learners distinguish the definition from an example.

Purpose: Build toward the stated learning objective.

5. automation

automation: Using a system to carry out tasks with less direct human action.

Automation can change part of a role.

Task: Use the word in a new example.

Teacher note: Model "automation" with the supplied example. Check that learners distinguish the definition from an example.

Purpose: Build toward the stated learning objective.

6. adaptability

adaptability: The ability to respond effectively to changed conditions.

Adaptability includes revising an unsuccessful approach.

Task: Use the word in a new example.

Teacher note: Model "adaptability" with the supplied example. Check that learners distinguish the definition from an example.

Purpose: Build toward the stated learning objective.

7. qualification

qualification: A recognized achievement or evidence of competence.

A qualification should demonstrate relevant learning.

Task: Use the word in a new example.

Teacher note: Model "qualification" with the supplied example. Check that learners distinguish the definition from an example.

Purpose: Build toward the stated learning objective.

8. workforce

workforce: The people who work in an organization or economy.

The workforce needs time to learn new processes.

Task: Use the word in a new example.

Teacher note: Model "workforce" with the supplied example. Check that learners distinguish the definition from an example.

Purpose: Build toward the stated learning objective.

9. Read and notice

A Training Plan for Northbridge

Task: What has not yet been tested?

Teacher note: Use the full reading printed in both worksheet versions. Check the four reading questions against the separate teacher key.

Purpose: Build toward the stated learning objective.

10. Listen for details

The Employee Representative's Proposal

Task: Listen once for the situation, then again for details.

Teacher note: Use the supplied recording or read the exact script in the separate listening teacher copy. Do not display the transcript during the listening check.

Purpose: Build toward the stated learning objective.

11. Useful language

- The evidence supports ____, but does not establish ____ .
- We prioritize ____ over ____ because the immediate constraint is ____ .
- We would revise this proposal if ____ .

Task: Adapt one frame to the situation.

Teacher note: These are language models, not answers to the reading or listening questions.

Purpose: Build toward the stated learning objective.

12. Pitch a six-week training pilot · 1

Studio constraint: Twelve employees; two paid training afternoons; a six-week pilot.

Task: Discuss your choice and explain your reason.

Teacher note: Use in the group activity. Present the studio as a fictional scenario, not a forecast about any real job market. Students may use imagined career interests.

Purpose: Build toward the stated learning objective.

13. Pitch a six-week training pilot · 2

Deliverable: A one-page proposal with two skills, a schedule, an assessment and a review rule.

Task: Discuss your choice and explain your reason.

Teacher note: Use in the group activity. Present the studio as a fictional scenario, not a forecast about any real job market. Students may use imagined career interests.

Purpose: Build toward the stated learning objective.

14. Pitch a six-week training pilot · 3

Review panel: Question one assumption, one resource trade-off and the difference between task speed and overall service quality.

Task: Discuss your choice and explain your reason.

Teacher note: Use in the group activity. Present the studio as a fictional scenario, not a forecast about any real job market. Students may use imagined career interests.

Purpose: Build toward the stated learning objective.

15. Your final response

State your choice. Give evidence. Recognize a limitation.

Task: What would make you change your response?

Teacher note: Allow thinking time, then invite a response. Accept equivalent language that meets the objective.

Purpose: Build toward the stated learning objective.
